

There are three main ways to get around Las Vegas

The CAT bus system is a 24hour system that services the airport and most hotels and casinos in the area that we will be in. The one way fare is \$1.75 and can be paid on the bus (exact fare)

There are several taxi companies that serve the airport. Taxis are located at the east side of baggage claim outside doors 1-4. The fare is \$1.80 airport charge, plus \$3.30 start up fee, plus \$2.40/mile. Circus Circus is 4 miles from the airport.

The third mode of transport in Las Vegas is by Limousine/sedan. If you wish to travel that way I suggest you go on line and set up your limousine travel that way. The average cost of a limo is \$68/hour; the sedan runs \$58/hour.

Travelling from the airport to Circus Circus.

Circus Circus does not have a shuttle of its own it relies on outside companies to provide shuttles from the air port to its site. The average cost is \$6.00/person for a one way trip. The shuttles are located outside of baggage claim at the airport.
